#### CONTENT

## PROBLEM STATEMENT

To develop and deploy a chatbot to assist the Legal and IP team of MANE.

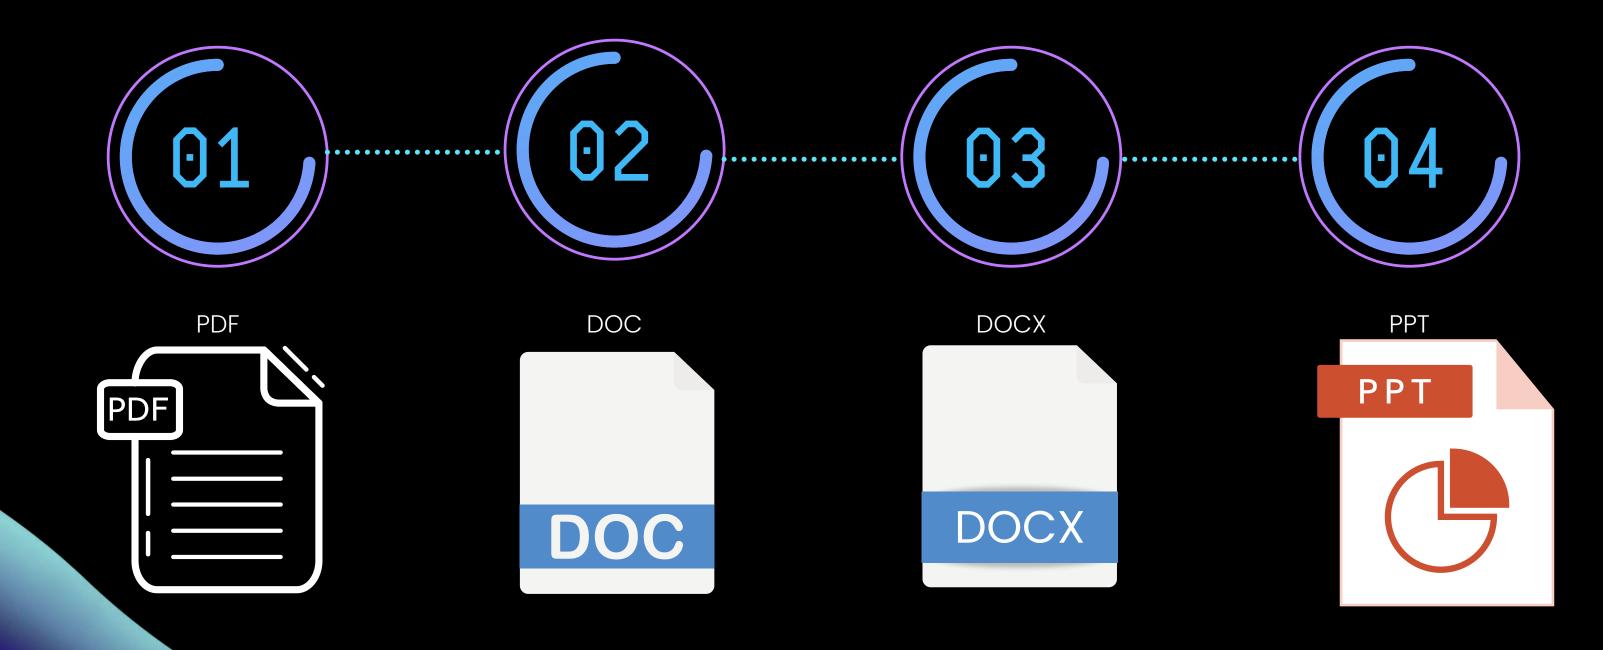

#### APPROACH

### DATASET

Total number of files: 79

#### TYPES OF FILES

#### PREPROCESSING OBJECTIVES

## CONVERSION TO TEXT FILES

Extracting content from various formats like PDF, DOC, and DOCX, with additional steps such as lemmatization to normalize words. This prepares the data for natural language processing tasks by creating a standardized and linguistically processed text.

#### DATA AUGMENTATION

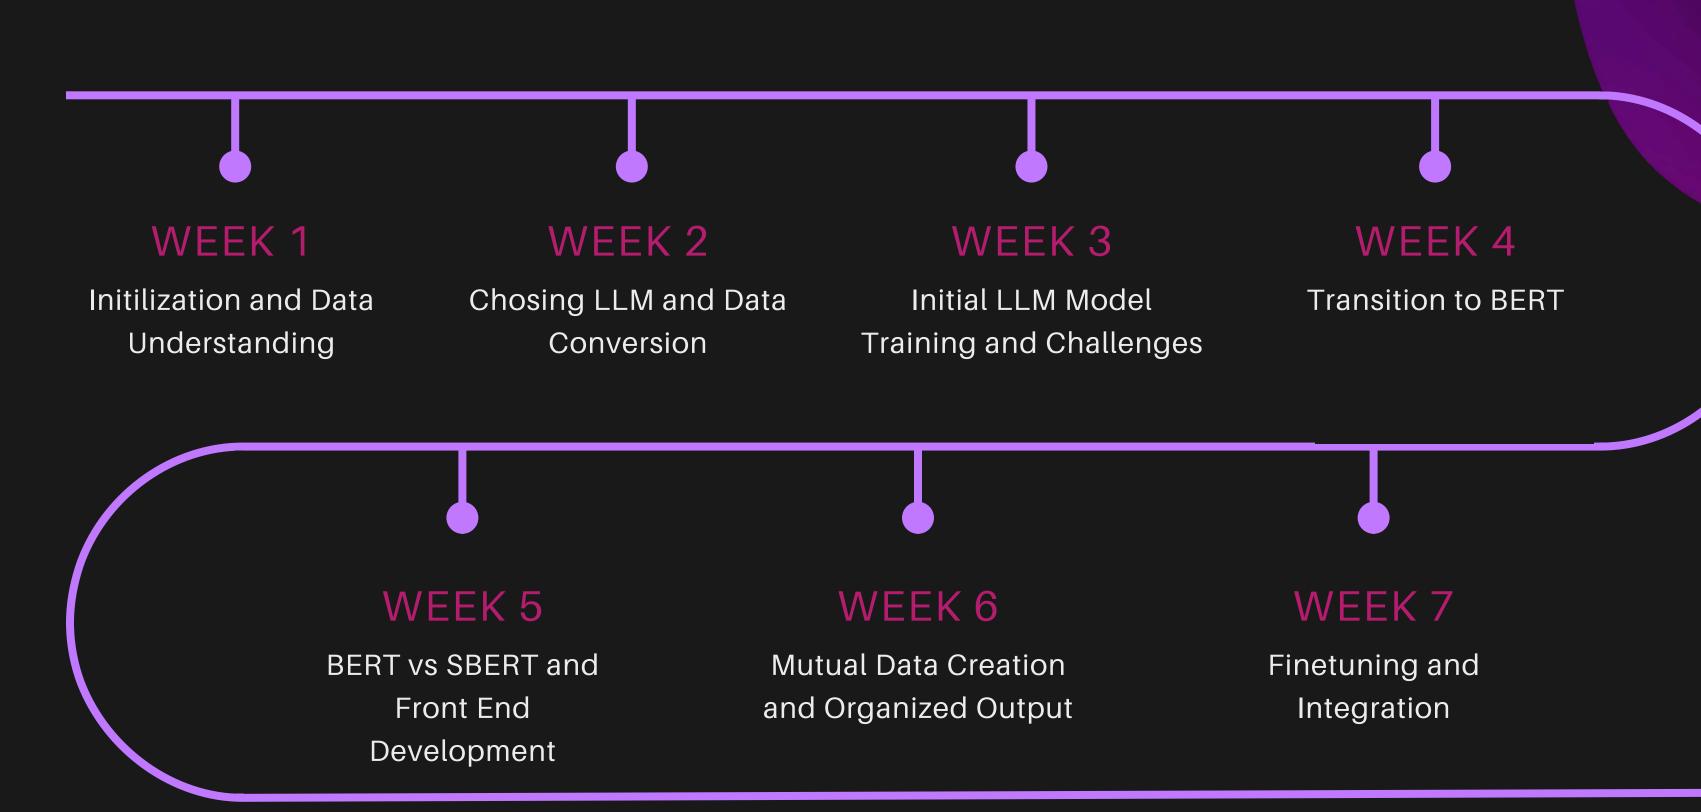

We had less and unstructured data

#### STRUCTURING

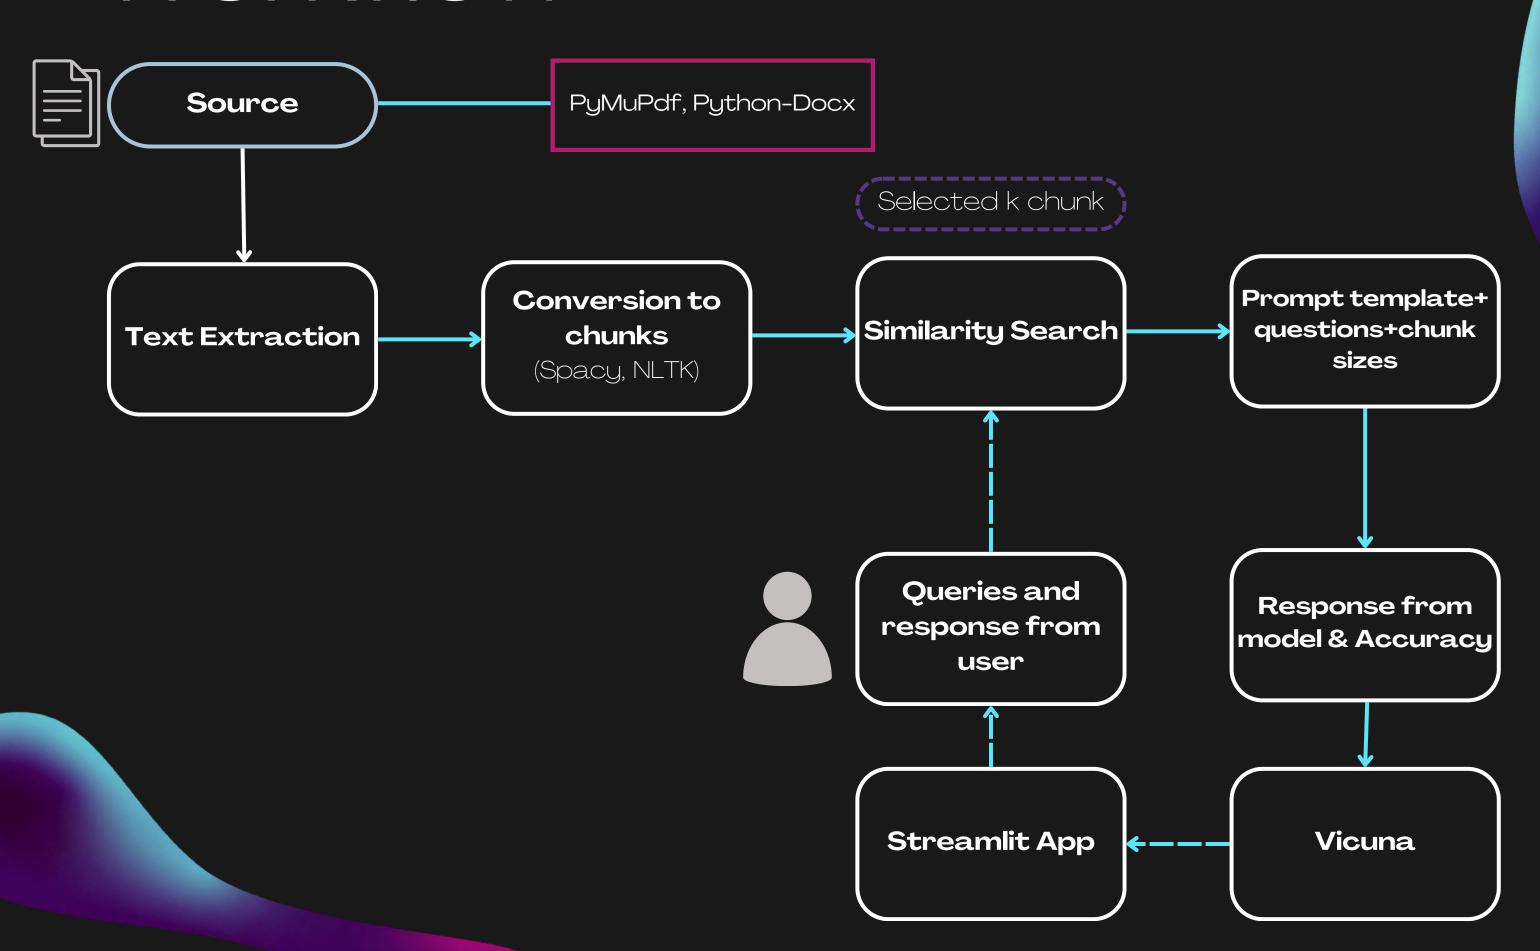

- Filename
- Context
- Question
- Answer

## Project Timeline

CHATBOT
WORKFLOW
AND
ALGORITHM
OVERVIEW

#### Workflow

#### 1. Initialization

- Model and Data Loading
- User Interface (UI) Setup
- 2. User Interaction
- User Input Handling
- Similarity Computation
- Displaying the Response
- 3. Thresholds for Response
- 4. User satisfaction check
- Satisfaction Handeling
- Medium Similarity
- Low Similarity

#### ALGORITHM OVERVIEW

## SEMANTIC SEARCH

#### Necessity

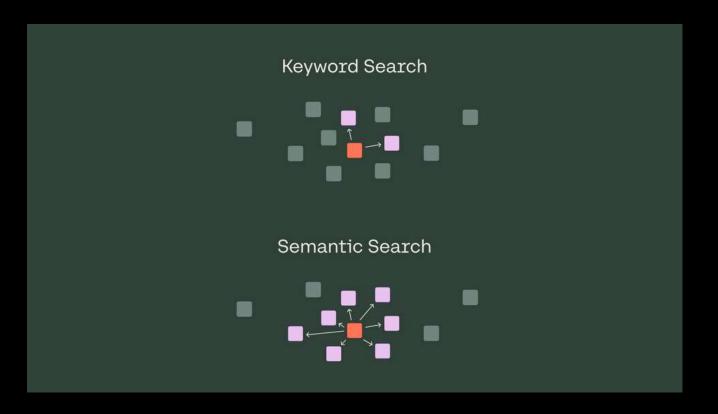

Match making beyond traditional methods

#### Capturing Context

Consider meaning or semantics of words/phrases

#### Adaptability

Handling wide range of user inputs

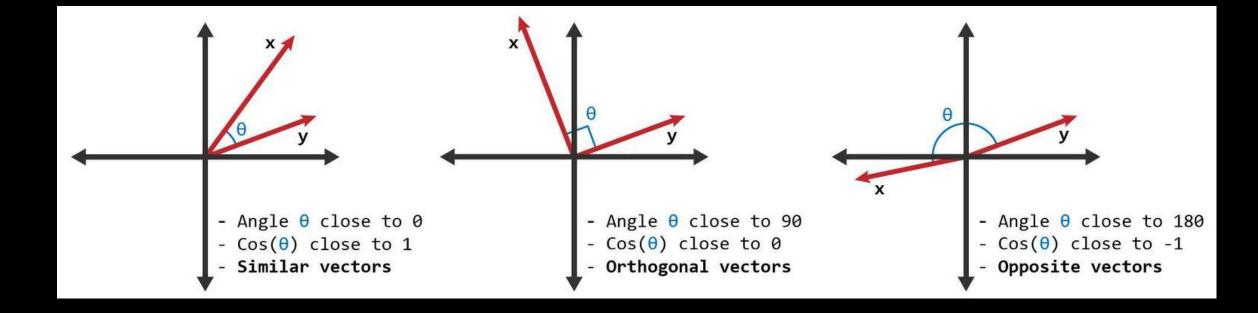

#### COSINE SIMILARITY

#### Matching Vectors

Identifying similar context vectors

#### Effective Retrieval

Matching without exact words in sequence

## Models

## WEB APP

#### Interactive Interface:

#### Streamlit

Open source python framework of ML and Data Science

Well-defined functions for each action and Streamlit UI

2 Easy to collaborate with our sbert model

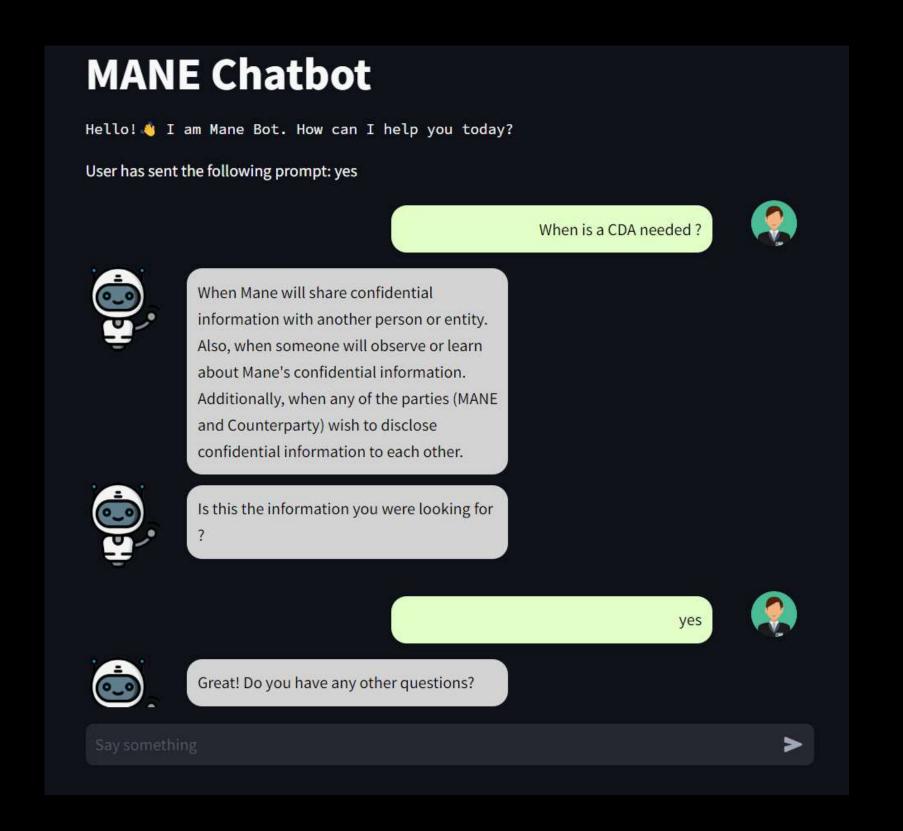

3 Simple to launch using localhost ports

Ease of maintenance and modification

## App Components

- USER AND BOT INTERCATION
- VICUNA INTEGRATION
- FILENAME IDENTIFIER
- MINIMALIST DESIGN
- USER-FRIENDLY INTERFACE

## Version Control & Documentation

- PRIVATE REPOSITORY
- SUPERVISED FROM DAY 1
- EFFECTIVE COLLABORATION
- LOG HISTORY
- RELIABILITY

https://github.com/ajinkya0919/Mane-Project

## AREAS OF IMPROVEMENT

- Enhanced Natural Language
   Understanding
- Expansion of Document Coverage
- File retrieval (Not filename!)
- Integration with Additional Systems
- Personalization and User Experience
- Improved Feedback Mechanisms
- Enhanced Security and Compliance Measures

## DEMO

#### **MANE Chatbot**

Hello! 🤚 I am Mane Bot. How can I help you today?

User has sent the following prompt: Does a patent guarantee the right to use an invention?

Say something

# THANK YOU!
